Subject Name: Special Studies on Clinical Sciences (疾患制御医学特殊研究)

Outline: Students will prepare for the publication of their thesis paper. To this end, students will make discussions with their supervisors as well as students and researchers around on how they describe the background, purpose, methods, results, and discussions.

Year, Semester (Module), Credit

1-2, All year,   Discussion : 2

Room: Each laboratory

Responsible Faculty Members and Contact Information；

 Program Chair

 Research Supervisors

 GIO

   To learn all process for publishing your research outcome for the world.

   For example, What to make clear? How to make experimental protocol? How to promote research? How to interpret results?

 SBO

 1. To be able to explain purpose and significance of your PhD research in your research field.

 2. To be able to explain background and the major trend of your research field in the world

 3. To be able to explain method to promote your research

 4. To be able to explain and discuss on research outcome adequately

 5. To be able to publish your research outcome for the world.

Course Schedule (weekly, depend on syllabus planning)

 Background and the major trend of your research field in the world

 Purpose and significance of your PhD research

 Selection of method to promote your research

 Explanation of research outcome and discussion for future direction

 Publishment of research outcome

 Arrangements for presentation of research outcome

Homework

To present your research outcome at internal and international scientific meetings. To communicate and discuss with first-class scientist, faculty, and students. To understand research outcome, and to explore future direction.

Grading Method and Criteria:

The supervisor evaluates the students temporarily by understanding level, progress and publication of research outcomes after each semester.

The students who;

-   can make and submit research article are evaluated as A,

-   can present research outcome at scientific meetings are evaluated as B or upper grade,

-   mostly fulfill the aim of the PhD research under the guidance of supervisor are evaluated as B or upper grades.

Textbook:

None
