Objectives					
Students are expected to learn the methods for separating biological materials and analyzing them in a qualitative as well as quantitative manner. They also learn the basic knowledge and techniques to analyze biological phenomena at the molecular level, and to present their results.

Levels for credit needed	Minimal requirement for credit grant (criteria common to all practical subjects of Sch. Med. Sci.): 1) At least 2/3 attendance to the class, and 2) Submission of reports evaluated as Grade C or higher.				
Text and materials	Experimental manuals will be handed out in advance. Voet's Fundamentals of Biochemistry is used a reference.				
Grade evaluation	In addition to performance in the class and the report evaluation, examinations may be underwent for particular subjects. For this subjected, evaluation is made by 【Class attendance, term paper and presentation】 .				
Remarks : Students should read each manual before experiments, and active participation in the experiments are essential. Bring the writing tools and A4 sheets of paper to write part of the term paper during the experiments.
