

## [List of Research Supervisor Groups]

Choose your prospective research fields from the list below and write the names in the “Prospective research fields (supervisors)” section on the application form. You can choose up to three research fields.

As a general rule, you will be assigned to a research group during the process of selecting students for admission, so please choose carefully. It is hard to determine the exact details of your prospective group’s research solely from the research themes listed below. In order to avoid having to write your Master’s thesis on a research theme different from what you had in mind, please contact the supervisor of your preferred fields or ask the contact person below for guidance about your choice.

For guidance, contact: Koji Hisatake, Provost, Master's Program in Medical Sciences, Graduate School of Comprehensive Human Sciences, University of Tsukuba

Phone 029-853-3007

FAX 029-853-3483

E-mail frontier@md.tsukuba.ac.jp

<b>Medical Sciences Basic Medicine</b>		
<b>Research Area</b>	<b>Faculty</b>	<b>Research</b>
Anatomy and Embryology	TAKAHASHI Satoru	<ul style="list-style-type: none"> <li>① Elucidation of molecular mechanism of pancreatic beta-cell development and its application.</li> <li>② Functional analysis of large Maf transcription factor family, MafB and c-Maf in macrophage development and functions.</li> <li>③ Elucidating biological roles of carbohydrates using glycosyltransferase conditional KO mice.</li> <li>④ Study of diseases and drug discovery by development of novel imaging system.</li> </ul>
Neurobiology	SHIGA Takashi	<ul style="list-style-type: none"> <li>① Roles of monoamines in the synapse formation</li> <li>② Effects of environmental factors on the development of brain and behavior</li> <li>③ Effects of gravitational stress on the brain</li> <li>④ Functional analyses of novel candidate genes involved in axonal guidance</li> <li>⑤ Analyses of neurodegenerative diseases at a molecular level</li> </ul>
Diagnostic Pathology	NOGUCHI Masayuki	<ul style="list-style-type: none"> <li>1. Study about molecular mechanisms of multistep carcinogenesis including precancerous or background lesions.</li> <li>2. Study about molecular carcinogenesis and early progression based on the genomic and epigenomic abnormalities and drug development targetted the early cancer</li> <li>3. Application of fetal protein to cancer diagnosis and therapy.</li> </ul>

Research Area	Faculty	Research
Experimental Pathology	KATO Mitsuyasu	<ul style="list-style-type: none"> <li>① Roles of Transforming Growth Factor-<math>\beta</math>- related molecules in cancer development</li> <li>② Cell division kinetics of cancer stem cells by application of three-dimensional quantitative analysis and live imaging</li> <li>③ Development of anti-cancer stem cell therapy using macrocyclic peptides screening</li> </ul>
Kidney and Vascular Pathology	NAGATA Michio	<ul style="list-style-type: none"> <li>① Mechanism of kidney diseases progression</li> <li>② Podocyte biology and glomerular diseases</li> <li>③ Glomerular cross-talk signals</li> <li>④ Renal vasculogenesis</li> </ul>
Systems Neuroscience	SHIDARA Munetaka	<ul style="list-style-type: none"> <li>① Brain information processing mechanism of motivation and reward expectancy</li> <li>② Research on reinforcement learning and decision-making mechanism in the brain</li> <li>③ Research on information coding mechanism of reward value in the brain</li> <li>④ Research on visual recognition mechanism in the brain</li> <li>⑤ Brain mechanism on emotional and social interaction</li> </ul>
Cognitive and behavioral Neuroscience	MATSUMOTO Masayuki	<ul style="list-style-type: none"> <li>① Roles of monoamine systems in cognitive, emotional and motivational brain functions</li> <li>② Brain mechanisms underlying value-based decision making</li> </ul>
Neurophysiology	KOGANEZAWA Tadachika	<ul style="list-style-type: none"> <li>① Study on the neural regulation of the cardiovascular system</li> <li>② Study on the neural regulation of the respiratory system</li> <li>③ Study on the neural regulation based cardiovascular and respiratory diseases</li> </ul>
Behavioral Neuroscience and Behavioral Neuroendocrinology	OGAWA Sonoko	<ul style="list-style-type: none"> <li>① Neuroendocrine basis of emotional and social behavior</li> <li>② Role and molecular mechanisms of estrogen receptors in the regulation of brain functions and behavior</li> <li>③ Brain mechanisms of sexual differentiation in behavior and genetic and environmental modulation</li> <li>④ Behavioral neuroscience of functional organization of the hippocampus and amygdala</li> </ul>
Biochemistry, Molecular Cell Biology	IRIE Kenji	<ul style="list-style-type: none"> <li>① Post-transcriptional regulation of gene expression by RNA-binding proteins</li> <li>② Molecular mechanism of mRNA localization and local translation regulating cell polarity, asymmetric cell division, and cell-fate</li> <li>③ Regulation of endoplasmic reticulum stress response</li> <li>④ Prospore membrane formation by vesicle docking</li> </ul>

<b>Research Area</b>	<b>Faculty</b>	<b>Research</b>
Biochemistr, Gene Regulation	HISATAKE Koji	①Molecular mechanisms of iPS cell induction ②Differentiation mechanisms of adipocyte ③Molecular basis of epigenetics ④Chromatin modifications and transcriptional regulation
Physiological Chemistry	OHBAYASHI Norihiko	①Physiological functions of the small G protein Arf6 ②Development of novel anti-cancer drugs targetting signal transduction sysytems ③Memebrane dynamics research aims at pathophysiology of fibrosis, invasion/metastasis, vascularization and pigmentation
Molecular Neurobiology	MASU Masayuki	①Molecular studies on neural development and neural circuit formation ②Molecular studies on signal transduction in the nervous system ③Molecular studies on heparan sulfate and lipid mediators in signal transduction
Infection Biology (Molecular Virology)	KAWAGUCHI Atsushi	①Molecular mechanism of virus replication , species specificity and pathogenicity of influenza virus ②Molecular mechanism of innate immunity ③Dynamics of chromatin remodeling and its function ④Chromosome translocation and tumorigenesis
Infection Biology (Molecular Parasitology)	HO, Kiong	①Understanding the mechanism of gene expression in protozoan parasites with a goal in identifying parasite-specific processes that can be exploited as targets for novel therapeutic interventions. ②Mechanism of mRNA recapping pathway in regulating gene expression. ③RNA repair - understanding of the function and mechanism behind cellular responses to RNA damage.
Immunology	SHIBUYA Akira	①To reveal host defense mechanisms against cancer and infectious diseases, and to develop their therapeutic manipulation ②To reveal cellular and molecular basis of allergy and autoimmune diseases, and to develop their therapeutic manipulation
Medical Genetics	NOGUCHI Emiko	①Identification of the susceptible genes related to allergic diseases ②Genetic analysis using next generation sequencer ③Functional studies of genes involved in allergy.

Research Area	Faculty	Research
Molecular and Genetic Epidemiology	TSUCHIYA Naoyuki	①Identification of genomic variants associated with susceptibility and clinical characteristics of human autoimmune rheumatic diseases such as systemic lupus erythematosus, ANCA associated vasculitis, systemic sclerosis and rheumatoid arthritis. ②Molecular mechanisms of <i>HLA</i> and other genes associated with autoimmune rheumatic diseases
Genome Biology	MURATANI Masafumi	①Integrative genome and epigenome analysis of clinical samples to understand mechanisms of cancer development and for discovery of new drug targets and biomarkers. ②Cell-free DNA and RNA profiling to monitor environmental stress responses in internal tissues.
	YAMADA Tomoko	With analyses of gene expression and genome architecture by sequencing, (1) Investigation of differentiation of neurons in mammalian cerebellum, (2) Examination of the molecular mechanism of learning and memory in cerebellum.
Regenerative Medicine and Stem Cell Biology	OHNEDA Osamu	①Development of Stem Cell Therapy using Mesenchymal Stem Cells ②Functional Analysis of Hypoxia Inducible Transcription Factors in vivo ③Analysis of Cancer Stem Cells and Tumor Stromal Cells
Stem Cell Biology and Biotechnology	NISHIMURA Ken	①Functional analysis of transcription factors during cell reprogramming ②Epigenetic regulation during cell reprogramming ③Safe and efficient production of differentiated tissue cells
Laboratory Animal Science	SUGIYAMA Fumihito	①Development of new technology for producing genetically modified mice. ②Development of genetically modified mice for analyzing biological function.
Medical Physics	SAKAE Takeji	①Development of techniques for high precision proton therapy ②Development of dose calculation system for neutron capture therapy ③Application of techniques for photon therapy ④Quality assurance of radiation therapy ⑤Development of new techniques for radiation measurement ⑥Study for radiation protection ⑦Basic research for acquiring information of biological function with image diagnostic techniques

Research Area	Faculty	Research
Radiation Biology	TSUBOI Koji	①Biological effects of proton beams on normal and cancer cells ②Radiation induced cell death and activation of tumor immunological reactions ③Particle beam induced DNA damage and repair
Environmental Biology	KUMAGAI Yoshito	①Environmental chemicals-mediated modulation of signal transduction pathways and its regulation ②Initial response and cellular protection against environmental chemicals
Molecular Biology	FUKAMIZU Akiyoshi	①Metabolism and methylation-regulated aging and longevity (cultured cells·C. elegans) ②Discovery of new methyltransferases and demethyltransferases, and its biological significance (cells·C. elegans·genetic model mice)
Developmental Genetics	NIWA Ryusuke	①Studies on interorgan communications for germline stem cell proliferation and maintenance. ②Studies on interorgan communications for regulating aging process ③Chemical biology for developing pesticides
Biomaterials Science	NAGASAKI Yukio	①Design of Nanomedicine ②Design of Drug Delivery System ③Design of Materials for Degenerative Medicine ④Design of Biointerfaces
Neuroscience	YANAGISAWA Masashi HUNATO Hiromasa	Our lab aims at solving the mystery of sleep ①Elucidation of the molecular mechanism regulating sleep/wakefulness through a forward genetic approach ②Medicinal chemistry to develop new drug for sleep disorder ③Visualization of neural and glial cell activity during sleep/wakefulness behavior
Molecular Behavioral Physiology	SAKURAI Takeshi	①Elucidation of physiological roles of novel neuropeptide ②Revealing the neural circuits and neural mechanisms that work in the system that regulates emotion. ③Studies on the neural circuits and neural mechanisms that play roles in the regulation of sleep/wakefulness states.
Sleep learning science	SAKAGUCHI Masanori	①Function of sleep in memory consolidation revealed by optogenetics ②The mechanisms of circuit integration of new neurons for brain regeneration ③Function of sleep in integration of new born neuron into memory circuits

<b>Research Area</b>	<b>Faculty</b>	<b>Research</b>
Brain maturation/ evolution	HAYASHI Yu	①Elucidation of the function of sleep focusing on brain maturation and aging ②Elucidation of the evolutionary process of sleep based on molecular and developmental approaches
Systems Sleep Biology	LAZARUS Michael	①Motivated behavior as a sleep-regulating factor ②Development of optopharmacologic tools to control sleep ③Link between REM sleep loss and the desire for junk food ④Hypothermia as risk factor for memory consolidation
Molecular Circuits of RNAi, Sleep, and Fear	LIU, Qinghua	
Medicinal Chemistry , Organic Chemistry	NAGASE Hiroshi KUTSUMURA Noriki	①Design and synthesis of orexin receptor agonists ②Design and synthesis of opioid receptor agonists and antagonists ③Elucidation of pharmacologies of orexin and opioid
Infection Biology (Bacteriology)	MORIKAWA Kazuya	①Infection strategies in Gram positive pathogens ②Adaptation mechanisms of staphylococci ③Interaction between host and bacteria
Molecular and Developmental Biology	KOBAYASHI Makoto	①Hematopoietic stem cell formation ②Digestive organ formation ③Cellular defense against oxidative and cellular stresses ④Toxicological study using zebrafish ⑤Aging and gerontology study using zebrafish ⑥Foods and chemicals for healthy life extension
Occupational psychiatry/Space psychiatry	MATSUZAKI Ichiyo	①A study of the strong qualities unexpectedly in space ②Salutogenesis and Sense of coherence ③Nature based Rehabilitation
Environmental Health Science	HONDA Yasushi	
Matrix and Stem Cell Biology	YANAGISAWA Hiromi	①Identification and functional analysis of novel extracellular matrix proteins in the vessel wall ②Phenotypic analysis of mutant mice with vascular diseases ③Molecular mechanism of mechanotransduction in the vessel wall ④Analysis of epidermal stem cell niche ⑤Identification of markers for epithelial stem cells

Research Area	Faculty	Research
Molecular Genetics (RIKEN)	ISHII Syunsuke	<ul style="list-style-type: none"> <li>①Mechanism of cancer formation</li> <li>②Reprogramming of somatic cells</li> <li>③Epigenetic regulation by stress</li> <li>④Transcription factors regulating development and differentiation</li> </ul>
Glycobiology (AIST)	NARIMATSU Hisashi	<ul style="list-style-type: none"> <li>①Discovery of glycol-biomarkers for cancer</li> <li>②Biological function of glycans in immunity</li> <li>③Biological function of glycans in infectious diseases</li> <li>④Diagnosis and treatment for IgA nephropathy</li> <li>⑤Analysis of glycan functions using knock-out mice</li> <li>⑥Development and application of technologies for glycans structural analysis</li> </ul>

<b>Clinical Medicine</b>		
<b>Research Area</b>	<b>Faculty</b>	<b>Research</b>
Nephrology	YAMAGATA Kunihiro	①Mechanism of chronic progressive kidney diseases ②Method of early diagnosis and prevention of kidney diseases ③Approach to treatment of progressive kidney diseases ④Epidemiology of acute kidney injury and chronic kidney disease ⑤Outcome research of lifestyle diseases
Clinical Immunology and Rheumatology	SUMIDA Takayuki	1) Molecular mechanism in autoimmune diseases such as rheumatoid arthritis and connective tissue diseases 2) Specific regulation of autoimmune diseases 3) Approach to genetic therapy and disease-specific iPS cells therapy in autoimmune diseases
Hematology	CHIBA Shigeru NINOMIYA Haruhiko	①Mechanism of leukemogenesis/lymphomagenesis ②Mechanism of bone marrow failure ③Translational research on stem cell therapy ④Megakaryocyte and platelet production ⑤Laboratory hematology for hematopoietic disorders
Medical Oncology and Gastroenterology	HYODO Ichinosuke	①Basic and clinical research on medical oncology ②Development of molecular targeted agent and novel therapy
	YANAKA Akinori	①Pathophysiology of H.pylori and NSAIDs-related GI disorders ②Studies in chemoprevention against GI cancers
Pulmonary Medicine	HIZAWA Nobuyuki	①Molecular genetics of chronic inflammatory lung diseases including asthma and COPD ②Role of genetics and environmental factors in allergic diseases ③Study of interactions between genetics and environment in respiratory diseases
	SATOH Hiroaki	①Study of chemotherapy for lung cancer ②Clinical application of carbohydrate antigens for respiratory diseases ③Optimal therapeutic strategy development for lung cancer in the elderly

Research Area	Faculty	Research
Pulmonary medicine, infection, and allergy	ISHII Yukio	① Elucidation of cellular and molecular mechanisms of pulmonary host responses to environmental stimuli, including cigarette smoke, antigens, chemical carcinogens, and microorganisms. ② Exploring the bio-markers in inflammatory and allergic lung diseases.
Cardiology	AONUMA Kazutaka MIYAUCHI Takashi KOIKE Akira HONMA Satoshi	① Establishment of mechanism and treatment of arrhythmia ② Establishment of evaluation of hemodynamics ③ Establishment of new treatment strategy of heart failure ④ Relation between arteriosclerosis and endothelial function ⑤ Exercise physiology and cardiac rehabilitation in cardiac patients ⑥ Medical quality assurance and risk management
Metabolism and Endocrinology	SHIMANO Hitoshi	① Molecular understanding of diabetes, dyslipidemia, obesity and insulin resistance ② Molecular mechanism and gene therapy for atherosclerosis ③ Making of pathological animal models by gene engineering ④ Sensing mechanism and transcriptional regulation of energy metabolism ⑤ Hub-metabolites and epigenetic regulation in carbohydrate, lipid, and protein metabolism ⑥ Brain fatty acid metabolism and higher brain functions ⑦ Regenerative medicine for pancreatic beta cells ⑧ Physiology and pathophysiology of different organs in the quality aspect of fatty acids ⑨ Novel approach to life-related diseases by nano-technology
Neurology	TAMAOKA Akira	① Molecular pathogenesis of Alzheimer's disease ② Pathology and biochemistry of neuromuscular disorders ③ Neurobiology of neurodegenerative disorders ④ Neuro-ophthalmology of neurological disorders ⑤ Clinical and epidemiological studies of organoarsenic intoxication
General Thoracic Surgery	SATOH Yukio	① Thoracoscopic surgery for lung cancer ② Multimodality therapy for lung cancer ③ Genetic alterations of lung cancer ④ Multimodality therapy for mediastinal tumor ⑤ Multimodality therapy for pleural mesothelioma ⑥ Mechanism of acute lung injury

Research Area	Faculty	Research
Cardiovascular Surgery	HIRAMATSU Yuji	<ul style="list-style-type: none"> <li>①Development of novel microangiography system using synchrotron radiation</li> <li>②Elucidation of signal transduction in aneurysmal formation</li> <li>③Elucidation of hematological deterioration during cardiopulmonary bypass</li> <li>④Study of ischemic myocardial remodeling using knockout mice</li> <li>⑤Development of novel tissue crosslinking treatment technology</li> <li>⑥Development of vitamin K-reduced functional food</li> <li>⑦Development of valve simulation technology</li> <li>⑧Exploration of valve-sparing right ventricular outflow reconstruction</li> <li>⑨Study in rehabilitation medicine in reduced venous return</li> <li>⑩Regulation of gaseous microemboli in cardiopulmonary bypass</li> <li>⑪Regenerative medicine using stem cells</li> <li>⑫Production of 3D heart replicas.</li> </ul>
Pediatric Surgery	MASUMOTO Koji	<ul style="list-style-type: none"> <li>①Bioengineered tissue transfer in infants and children</li> <li>②Studies related to carcinogenesis and progression of malignant solid tumors in children</li> <li>③Pathological, molecular biological and genetic studies of the alimentary tract malformations</li> <li>④Studies of treatment for hypoplastic lungs in congenital diaphragmatic hernia</li> </ul>
Gastrointestinal and Hepato-biliary-pancreatic Surgery	( )	<ul style="list-style-type: none"> <li>1)Platelet and regenerative medicine: To clarify the mechanisms of liver regeneration by platelet function and aging platelet.</li> <li>2)Drug delivery system : To investigate the mechanisms of liver injury and to develop a method of prevention by the use of a novel DDS.</li> <li>3)Surgical metabolism and wound healing: To develop a novel treatment for minimizing intestinal damage under surgical stress.</li> <li>4)Multipotential stem cells and regenerative medicine: To develop a gastroenterological tissue or organ bud in micro-environment with placental or/and other tissue derived stem cells for transplantation trials.</li> <li>5)CancerComprehensive elucidation of cancer genesis and metastasis by analyzing cancer stem cells, local microenvironment (incl. fibroblast and platelets), and niche in metastatic site (liver Kuppfer cells, platelets). Paying special interest on cancer specific glyco-proteins, which will confer bran-new therapeutic strategy that specifically target cancers by glycan-lectin interaction:</li> <li>6) Computer assisted Surgery (CAS): To develop and apply the system of the CAS and the novel surgical education system through the medical-engineering collaboration.</li> </ul>

Research Area	Faculty	Research
Neurosurgery	MATSUMURA Akira	<p>1) <b>Neurooncology</b></p> <p>1)-1 <b>Neurooncology(Advanced Therapeutics):</b> Boron neutron capture therapy(BNCT), Proton therapy, Tumor vaccination, Gene therapy, Photodynamic diagnosis and treatment (PDD, PDT)</p> <p>1)-2 <b>Neurooncology(Diagnostics):</b> Molecular marker and gene analysis of brain tumor(glioma, pediatric brain tumor, craniopharyngioma), Intraoperative neurophysiological monitoring (MEP, SEP, EEG), Imaging study(Intraoperative MRI, Tractography, PET)</p> <p>2) <b>Cerebrovascular disease:</b> Neuroprotection using nanoparticle and stem cell therapy for ischemic stroke. Prevention of carotid artery restenosis. Evaluation of oxidative stress in brain.</p> <p>3) Analysis of <b>cerebral function, perfusion and metabolism using neuroimaging</b> (functional -MRI, MR spectroscopy, diffusion tensor imaging, PET)</p> <p>4) Neurorehabilitation using <b>Robot Suit HAL</b>, Brain machine interface</p> <p>5)<b>Functional neurosurgery</b> for epilepsy, involuntary movement, central pain and Headache</p> <p>6) <b>Gene therapy and regeneration therapy</b> using DDS (Angiogenesis, bone regeneration)</p> <p>7)<b>Pediatric Neurosurgery:</b> Epigenetic biomarkers from woman with neural tube defect affected pregnancies</p> <p>8) <b>Development of advanced medical equipment and device</b> (laser endoscope, new device of endoscopic surgery)</p>
Control of the Musculoskeletal System	YAMAZAKI Masashi	<p>Clinical and basic research on following themes:</p> <p>①Treatment of spinal disorders</p> <p>②Treatment of joint disorders</p> <p>③Sports medicine</p> <p>④Regeneration of peripheral nerve</p>
Urology	NISHIYAMA Hiroyuki	<p>①Cancers of genitourinary system</p> <p>②Urodynamics</p> <p>③Andrology</p> <p>④Urolithiasis</p> <p>⑤Urinary tract infection</p>
Ophthalmology	OSHIKA Tetsuro	<p>①Visual science</p> <p>②Visual optics</p> <p>③Minimally invasive ocular surgery</p> <p>④Vision-related quality of life</p>
Otology & Equilibrium Research	HARA Akira	<p>Study on theories and methods for pathophysiological, electrophysiological and biochemical research in otology and cochleoneural path way.</p>

Research Area	Faculty	Research
Oral and Maxillofacial Surgery	BUKAWA Hiroki	<ul style="list-style-type: none"> <li>①New development of biological marker for oral cancer (p63 and GNT-V)</li> <li>②Research for clinical diagnosis and treatment of oral cancer using microRNA (miR203, miR155, miR205 and let-7)</li> <li>③Regenerated research using dental pulp stem cell</li> <li>④Research for oral bacterial flora involved internal medical disease (NASH, NAFLD and diabetes mellitus)</li> </ul>
Psychiatry	ARAI Tesuaki	<ul style="list-style-type: none"> <li>①Molecular neuropathology of dementia and neurodegenerative disorder</li> <li>②Clinical study of diagnosis, therapeutics, prevention and care of dementia</li> <li>③Neuroimaging of neuropsychiatric disorders</li> <li>④Clinical and social psychiatry for depression</li> <li>⑤Suicidology and suicide prevention</li> </ul>
Obstetrics and Gynecology	( ) HAMADA Hiromi	Basic and clinical researches about diagnosis, treatment, and prevention of diseases/disorders in the field of obstetrics and gynecology are conducted. Major subjects are gynecological malignancy, infertility, reproductive endocrinologic disorder, fetal genetic disease/malformation, fetomaternal infection, maternal, natal, and puerperal complications, menopausal disorders, etc. On-going studies include cervical cancer prevention, molecular biology of gynecological cancers, novel therapeutic strategies for gynecological cancers, thromboembolism, prenatal diagnosis, fetal gene therapy, pregnancy-induced hypertension-related genes, fetal magnetocardiography, etc.
Diagnostic Radiology	MINAMI Manabu	<ul style="list-style-type: none"> <li>①New development of diagnostic imaging method using 3-dimensional CT data: esp. virtual endoscopy</li> <li>②Research on radiologic-pathologic correlation in various organs</li> <li>③New development of qualitative/quantitative methods using MR imaging</li> </ul>
Radiation Oncology	SAKURAI Hideyuki	<ul style="list-style-type: none"> <li>①Research for radiosensitivity, and improvement of radioresistance</li> <li>②Radiation treatment planning using multimodality imaging</li> <li>③New cancer therapy using particle radiation therapy</li> </ul>
Anesthesiology	TANAKA Makoto	<ul style="list-style-type: none"> <li>①Effects of anesthetics and anesthetic techniques on arterial baroreflex function</li> <li>②Genetic polymorphism of opioid receptor in humans</li> <li>③Research on basic mechanisms of pain perception</li> <li>④Effects of anesthetics and age on Bispectral Index</li> </ul>

Research Area	Faculty	Research
Clinical laboratory medicine	KAWAKAMI Yasushi	<ul style="list-style-type: none"> <li>①Molecular understanding of the endocrine tumor and apoprotein.</li> <li>②Molecular analysis of the cell proliferating factor.</li> <li>③Molecular understanding of the hormone synthesis and secretion.</li> </ul>
Molecular Sportology	SHODA Junichi	<ul style="list-style-type: none"> <li>①Development of novel exercise training for obese subjects with life style-related diseases</li> <li>②Imaging analysis of organ lipid accumulation in obese subjects with life style-related diseases</li> <li>③Development of glyco-biomarkers for obesity and life style-related diseases</li> <li>④Development of novel animal models for obesity and life style-related diseases</li> <li>⑤Exercise-induced activation of antioxidative stress systems</li> <li>⑥Understanding of exercise-induced inhibitory mechanism against carcinogenesis</li> </ul>
	TAKEKOSHI Kazuhiro	<ul style="list-style-type: none"> <li>①Personalized treatment for exercise through using genetic information</li> <li>②Research for anti-doping</li> <li>③Exercise and hormone, especially catecholamine</li> <li>④Exercise and stress marker, especially salivary Chromogranin A (collaborated with Prof. Omori)</li> </ul>
Pharmaceutical Sciences	HONMA Masato	<ul style="list-style-type: none"> <li>①Gene Polymorphism analysis for assessing drug metabolizing enzymes and transporters</li> <li>②Therapeutic drug monitoring for assessing drug efficacy and adverse reactions.</li> <li>③Pharmacokinetic analysis of Kampo-medicine (Japanese herbal remedies)</li> </ul>
Emergency and Critical Care Medicine	INOUE Yoshiaki	<ul style="list-style-type: none"> <li>①Molecular biology of septic shock and shock</li> <li>②Molecular biology of acute respiratory distress syndrome and multiple organ failure</li> <li>③Molecular biology of clinical toxicology</li> <li>④Molecular biology of delirium</li> </ul>
Clinical Research and Regional Innovation	HASHIMOTO Koichi	<ul style="list-style-type: none"> <li>①Development of effective prevention treatment for lifestyle-related diseases</li> <li>②Regional innovation through clinical research network</li> <li>③Education of experts of integrative celerity research process for translational researches</li> <li>④Development of practical management of technology</li> <li>⑤Construction of seamless platform for translational research</li> </ul>

Research Area	Faculty	Research
Primary Care and Medical Education	MAENO Tetsuhiro	①Clinical research in primary care ②Development of community-based medical System ③Health promotion in the community ④Clinical medical education

Public Health / Human Care Science		
Research Area	Faculty	Research
International Community Care and Lifespan Development: Empowerment Sciences	ANME Tokie	①Community empowerment ②Plasticity of lifespan development and implications ③System sciences for health social services
Gerontological Nursing & Caring	MATSUDA Hitomi	①The physiological effect of a narrative care for the elderly ②Adjustment of a life rhythm for the elderly with dementia ③QOL of the family caregiver ④Infection control for the elderly
	HASHIZUME Yumi	①Gender issues and Japanese family Caregiving, Interpersonal support for the middle-aged couple ②Toyamgata day service ③Community care and carers, caregivers ④Community care in Mongolia ⑤Qualitative research method (Grounded theory approach)
Health Services Research	TAMIYA Nanako	①Health Services Research (especially older people and children) ②Cooperation of medical care and welfare in the local community ③Policy evaluation of the long-term care insurance system ④Study for the improvement of the quality of in-home care and facility care for older people and people with disability ⑤Public Health based on legal medicine (older people, child abuse, solitary death, actual state of service-related death, etc.)
Epidemiology	WAGATSUMA Yukiko	①Principles and methods in epidemiology and their applications ②Medical statistics and medical information science ③Epidemiology for diseases ④Sociological survey in the field of medicine ⑤Methods of clinical trials ⑥Strategy to control diseases in developing countries

<b>Research Area</b>	<b>Faculty</b>	<b>Research</b>
Social Psychiatry & Mental Health	SAITO Tamaki	①Asocial problem behaviors in childhood and adolescence ②Development disorder and maladaptation ③Rehabilitation of people with mental disorder
	MORITA Nobuaki	①Mental health of victims, Psychotherapy ②Intervention and treatment for family violence (Child abuse, Domestic violence, alder abuse and parent abuse by children) ③Recovery of addiction (Substance use disorder, Pathological gambling and internet dependence) ④Forensic psychiatry, Criminology
Forensic Medicine	HONDA Katsuya	①Research on forensic DNA testing ②Mitochondrial DNA polymorphism ③Studies on the toxicological mechanism of xenobiotics ④Research of molecular autopsy on sudden unexpected death
Global Public Health	ICHIKAWA Masao	①Global health research ②Community design & health ③Injury prevention & control
Medical Science and Welfare	YANAGI Hisako	①Preventive medicine for non-communicable diseases and frailty, Medical welfare for elderly ②Genetic counselling, Bioethics
Health care policy and Health economics	KONDO Masahide	①Application of economics for health care ②Health care policy research ③Global health economics
Livelihood Support Science	TOKUDA Katsumi	①Child care and guardians' support ②Beggars with disabilities ③Cemetery, graves and tombs
	MIZUNO Tomomi	①Barrier-free ②Child care and guardians' support ③Understanding persons with special needs
