The United Nations Population Fund disclosed in 2012 that 80% of the 1.5 billion older people in the world would live in developing countries by 2050, thus aging is an urgent, global-scale issue.

In this conference on Global Aging, we aim to share our ideas and fruits of researches on old-age issues through medical, nursing, care, social, and cultural points of view; as well as advocate policies on aging for each country.

**Opening Remarks:**
Prof. Kyosuke Nagata
President of the University of Tsukuba
