Analyzing Cancer Genome using Watson for Genomics (WfG)

This seminar will describe IBM's Watson for Genomics (WfG) and state of the art genomic cancer analysis. WfG uses artificial intelligence technology to exploit large volumes of data and literature to allow fast, scalable and informed cancer genome analysis approaches for clinicians and patients.

International Guest Speaker:

Takahiko Koyama, PhD
Lead Scientist - IBM Watson Genomics
Thomas J. Watson Research Center, USA.

時間: 2016年12月2日 (金) 17:00-18:00
場所: イノベーション棟 8 階
(8FL Innovation Bld)
