The impact of testosterone in the cardiovascular system: still a controversial topic

16:00〜17:15, Fri., September 20, 2019
Seminar room, Building A, TARA Center

Rita C. Tostes, Ph.D. FAHA
Professor,
Department of Pharmacology
Ribeirao Preto Medical School
University of Sao Paulo

Dr. Tostes’s scientific interests are signaling pathways that drive vascular dysfunction in cardiovascular and metabolic diseases, including hypertension, diabetes and obesity, and how testosterone, aldosterone and the immune system contribute to vascular injury in these diseases.
