Design the Future  
Curiosity-driven Quests for Global Solutions

Date : 9/26 (Tue.) – 28 (Thu.), 2023  
Venue : Tsukuba International Congress Center / Online

## Tsukuba Digital-Bio International Center & JETRO - Food Resources Research for the Future of the Earth -

### 9/28 (Thu.) 10:30-12:00

Official Language: English

Venue : Tsukuba International  
Congress Center, 201B  
Onsite / Hybrid

The Tsukuba Digital-Bio International Center aims to establish an international innovation ecosystem in collaboration with the Japan External Trade Organization (JETRO). The "creation of a new supply chain using seeds of food and medicine" is a major R&D theme of the center. In this session, together with the Global South, we will discuss how we can contribute to solving global problems by building evidence for health improvement and disease prevention from food resources, and how we can link and expand the creation and promotion of supply chains for these products. We would like to exchange various opinions in order to create a "Well-being society for all generations," which is the vision of this center.
