HE40233		Practice of	Clinical Pharm	nacology	臨床薬理学実習		
	Class	Unit	Module	Week	Time	Room	
	3rd	1	Fall A	Wednesday Thursday	4-5th 3-4th	4B112	
Inst	tructors (Off	ice • Tel • email • C	office hour)			I	
		ishi (Health and M		Innovation Lab Bu	ilding, Room 304;	TEL: 3287)	
	·	Health and Medica			0.		
-		o (E Building, 2nd				·	
Obj	ectives						
•		ogical functions in	the animal and	l understand mech	anisms of action of	of drugs.	
•	Develop basi	c pharmacological	principles you	have studied to lea	rn theory and pra	actice of	
	drug therapy	y in clinical medicin	ne.				
•	Experience t	he process of clinic	al trials throug	gh group studies ar	nd role-plays to		
	understand	importance of clinic	cal trials in dru	ıg development			
Lar	iguage: 🖌	/ 🗆 Japanese	🗆 English 🗸 🔽	Bilingual			
	Date	Name of instruct	or	Lecture outline			
1	10/3	Ohbayashi N,	Introduct	Introduction, preparation of reagents			
		Funakoshi Y	Introduct				
2	10/4	Ohbayashi N,	Effects of	Effects of insulin and epinephrine on blood glucose levels-1			
		Funakoshi Y					
3	10/10	Ohbayashi N,	Effects of	Effects of insulin and epinephrine on blood glucose levels-2			
		Funakoshi Y					
4	10/11	Ohbayashi N, Funakoshi Y	Mechanis	Mechanisms of action of adrenergic receptor antagonists-1			
5	10/17	Ohbayashi N, Funakoshi Y	Mechanis	Mechanisms of action of adrenergic receptor antagonists-2			
6	10/18	Ohbayashi N, Funakoshi Y		Discussion of the results, lectures on the regulation of blood glucose			
7	10/24	Hashimoto K	The proce	The process of pharmaceutical drug development			
8	10/25	Hashimoto K	Protocol d	Protocol design and implementation of clinical trials			
9	11/1	Hashimoto K	Role-paly	Role-paly of informed consent in clinical trials-1			
10	11/7	Hashimoto K	Role-paly	of informed conser	nt in clinical trials	5-2	
	vels needed for credit		1) At least $2/3$	grant (criteria com attendance to the higher.			
Text and materials		Will be distributed					
Grade evaluation		In addition to performance in the class and the report evaluation, examination may be undergone for particular subjects. For this subjected, evaluation is made a [Report and attitudes to the practice].					

the importance of clinical trials for drug development.
