

Pediatrics

Principal Investigator: Hidetoshi Takada
E-mail.address: TakadaH@md.tsukuba.ac.jp
URL: <https://www.md.tsukuba.ac.jp/clinical-med/pediatrics/>

Other Faculty Members

Associate Professor: Yayoi Miyazono: y-myza@md.tsukuba.ac.jp
Lecturer: Hiroko Fukushima: fkhiroko@md.tsukuba.ac.jp
Lecturer Atsushi Iwabuchi: a.iwabuchi@md.tsukuba.ac.jp
Lecturer: Kazuo Imagawa: imagawa-tuk@md.tsukuba.ac.jp

Major Scientific Interests of the Group

We aim to understand physiologic and pathologic processes of growth and development in terms of molecular mechanism in embryogenesis, differentiation, apoptosis and regeneration. Development of methods to improve human health and control diseases on the basis of the above results.

Projects for Regular Students in Doctoral or Master's Programs

- 1) Molecular and genetic mechanism of diseases of children.
- 2) Functional and quantitative analysis of the development of children with and without diseases.
- 3) Establishment of novel gene therapy.

Study Programs for Short Stay Students (one week – one semester)

- 1) Surface marker analysis of peripheral blood cells, and use of flow-cytometer for molecular functional analysis.
- 2) Genetic analysis of diseases of children.
- 3) Functional and quantitative analysis of child development.
- 4) Culture of stem cells and functional analysis of cord blood cells.
